

Amiya Ranjan Kabi

📞 07352390006 — ✉ amiyakabi28@gmail.com — 🔗 linkedin.com/in/amiyaranjan28 — 📍 Jamshedpur, India

Profile

Postgraduate student in Power System Engineering with strong foundations in electrical engineering, automation, and modeling. Experienced in SCADA-based process monitoring, control systems, and MATLAB/Simulink simulation. Currently learning C programming and other basic programming tools to expand skills towards software-driven applications. Passionate about applying engineering and simulation knowledge to real-world energy and automation challenges.

Education (Certificates)

National Institute of Technology, Jamshedpur <i>Master of Technology in Power System Engineering – 9.61 CGPA</i>	Sep 2024 – Present
Jharkhand University of Technology, Ranchi <i>Bachelor of Technology in Electrical and Electronics Engineering – 9.05 CGPA</i>	Nov 2021 – Jun 2024
Jharkhand University of Technology, Ranchi <i>Diploma in Electrical Engineering – 87.06%</i>	Sep 2019 – Oct 2021

Skills

Programming & Simulation

- C (basic), MATLAB/Simulink, Simscape
- NI LabVIEW (automation validation)
- AutoCAD (technical drawings)

Automation & Control Systems

- PLC, DCS, SCADA, HMI (Siemens)
- Instrumentation and control systems for data acquisition
- Real-time dashboards with Simatic WinCC and Litmus

Electrical Systems

- Power system engineering and distributed generation
- Energy storage systems: Battery and Fuel Cell
- Process monitoring and predictive maintenance

Key Strengths

- Strong analytical and problem-solving skills
- Quick learner with adaptability to new tools and technologies
- Hands-on industrial exposure in automation and maintenance
- Effective communication and teamwork in cross-functional projects
- Detail-oriented approach with focus on reliability and safety

Experience

Junior Engineer and Shift In-charge, Tata Steel Limited - Jamshedpur • Automated shift data reporting using SAP S/4 HANA, reducing manual effort. • Designed operational dashboards and ESI reports to support management decisions. • Led TQM, SGA, and Kaizen initiatives focused on improving system reliability.	July 2024 – Aug 2024
Integrated Electrical Maintenance Assistant, Tata Steel Limited - Jamshedpur • Monitored and analyzed process parameters using SCADA/IIoT platforms. • Supported preventive and predictive maintenance through data acquisition systems. • Validated automation processes using NI LabVIEW and contributed to reliability improvements.	Apr 2019 – Oct 2021

Publications

- **Comparative analysis of Battery vs. Hydrogen Fuel Cell energy storage devices for Distributed Generation under Micro Grids** – submitted to IEEE SEFET 2025.
- **Estimation and comparison of solar radiation for Thiruvananthapuram using sunshine-based, temperature-based, and latitude-based models** – submitted to EPREC 2026.

Projects

Industrial Projects at Tata Steel Limited

- Built dashboards for process monitoring using Simatic WinCC and Litmus, enabling real-time decision-making.
- Designed visualization frameworks to analyze operational data, track trends, and optimize energy usage.
- Applied anomaly detection techniques for early fault identification and downtime reduction.

Bachelor of Technology Project

- Weather surveillance and ambience monitoring rover using IoT applications (Link).

Courses and Certifications

Professional Learning

2019 – Present

- Tata Steel School of Excellence - Industrial Internet of Things
- Tata Steel School of Excellence - Data Management & Automation
- Tata Steel School of Excellence - Plant Automation
- Tata Steel School of Excellence - Process Instrumentation and Control System
- Introduction to C Programming (self-learning, in progress)

Extra Curricular Activities

Volunteering in Jamshedpur Blood Bank

Joint Development Committee Blood Donation Camps

Member of NGO, Green Nation

Feb 2022 – Jun 2024

Supported nearby villagers with education, healthcare, and livelihood assistance

Hobbies

- Guitar Learner
- Freestyle Swimming
- Outdoor Activities
